

MAG METER MANHOLE

RELIABLE, ACCURATE
MAGNETIC FLOWMETERS

CLEAN, SAFE & CONVENIENT SERVICING

The Plasti-Fab Mag Meter Manhole was durably designed for frequent and convenient use. The one-piece, monolithic construction prevents leaky joints and a full opening hinged lid and bright white gel coating offers better interior light conditions. These features create a cleaner, safer environment for servicing.

Mag Meter Manhole Features:

- Full access hinged FRP lid (4' or 5') including lockable hasp and self latching lid prop.
- All hardware is T-304 stainless steel.
- Flanged pipe connections.
- Threaded tap for cable penetrations.
- 4 ft, 5 ft or 6ft diameter barrel standard. Larger dimensions available.
- OSHA approved FRP ladder with non-skid tread.
- Quick and easy to install with minimal downtime.

PLASTI-FAB'S MAG METER MANHOLES

Mag Meter Manholes options:

- Manholes shipped with meter pre-installed or with a spool piece sized to your specifications.
- **Backflow service valves** available for smaller sizes.
- **Cone top** for highway rated H-20 lid.
- **Sump**
- **Storm covers or insulated enclosures** available for remote sites.
- **Single or multiple units** depending on size.
- **Other options** available on request or as required.

Easy To Install Both Small And Large Flumes With PMMs

Not only are Mag Meter Manholes appropriate for large sized flumes, but they are an advantage when installing small flumes as well. Standard 4' concrete manholes cannot always accommodate small flumes without additional installation and grout work. The PMM has factory formed inlet and outlet transition approach sections assuring proper conditioning.

A WORLD OF SOLUTIONS IN WASTEWATER CONTROL

Plasti-Fab is the recognized leader in corrosion resistant equipment for water and wastewater treatment and control, specializing in Reinforced Copolymer (FRP) equipment for industry and infrastructure. Our equipment for industry and infrastructure. Our equipment is resisting corrosion in abusive environments all around the world. Contact one of our technical experts today to discuss how your specific requirements will be met with Plasti-Fab quality products and custom services.
